

HEALTH SCIENCE CAPACITY BUILDING PATHWAY

HEALTH SCIENCE NEWS BLAST

THE GOAL OF HEALTH CAREERS EDUCATION

"The goal of the health careers education program is to establish a rich, rigorous, integrated health careers path, kindergarten through employment, to serve students from every school in California. Establishing quality integrated programs that are accessible to all students will enable them to fulfill their individual career goals and will help meet the health care industry's human resource demands." (CDE 2008)

Isn't it a wonderful thought that we are a part of making this goal a realization? We are all striving to make a genuine, measurable difference for our students, our schools, and our communities. We can all be proud of the fact that the dollars we are spending will make a real impact!

CHECK OUT PROJECT READ

Project READ is an independent study program designed for busy educators who wish to remain on the "cutting edge" in their chosen disciplines. Project READ was developed by the University of San Diego Division Of Continuing Education in conjunction with educators from the Department of Defense Education Activity and Overseas International Schools. In addition to the expanded categories of readings and book titles, the new online iteration of Project READ is intended to be paper-less. Registration and responses to books read may be completed online and via e-mail. This program works with a number of nurses in order to identify important literature in the health field that other nurses and health educators can review for their own professional development.
